Turkish

Experience

● Flygames (Web Developer – Remote)

Istanbul, Turkey

Aug 2022 – May 2023

- Developed and maintained frontend and backend functionalities using Laravel and PHP.
- Managed database operations, queries, and data integrity using PHP and MySQL.
- Implemented user authentication with Laravel's built-in system and API authentication using Laravel Passport.
- Utilized Blade templating engine to create dynamic, reusable components, ensuring a responsive and user-friendly interface.
- Collaborated with cross-functional teams to improve website performance and user experience.
- Used Git for version control and collaborated on GitHub to manage codebase changes and track project progress.

● Rubino (Assistant It Manager)

Tehran, Iran

Feb 2017 - Feb 2022

- Developed kitchen appliance projects using C# for programming and software solutions.
- Monitored and maintained servers (Backup, Antivirus, etc.), ensuring operational stability and security.
- Diagnosed and resolved hardware issues, improving system performance and minimizing downtime.

Project

● Full-Stack Developer (Personal Project)

Planner Web App

- Built a full-stack Planner Web App using React.js for the frontend and Node.js with MongoDB for the backend.
- Developed features for user registration, login, and task management, creating a clean and intuitive user interface.
- Utilized React's state management to efficiently handle user tasks and notes, ensuring a smooth and responsive experience.
- Integrated Bootstrap to design a responsive and visually appealing layout, enhancing the app's user experience across different devices.
- Designed and implemented the backend with Node.js and Express, connecting it to MongoDB to store user data.
- Strengthened full-stack development skills by working on both frontend and backend, gaining experience in building complete web applications.
